

GENE SERABYN
 Jet Propulsion Laboratory
 California Institute of Technology
 4800 Oak Grove Drive
 MS 183-900, Pasadena, CA 91109
Tel: 818-640-7485;
email: gene.serabyn@jpl.nasa.gov

POSITIONS

Senior Research Scientist, Principal Scientist, Research Scientist, JPL	3/98 - present
Visiting Fellow, Hokkaido Univ	01-02/2008
Visiting Associate, Caltech	1998 – 2014
Sr. Research Associate, Sr. Research Fellow, Research Fellow, Caltech	1/87 - 2/98
Assistant Scientist, Max Planck Institut für Radioastronomie, Bonn, Germany	2/85 - 12/86

EDUCATION:

Ph.D. – Physics – UC-Berkeley; 12/84
 B.S. – Physics – MIT; 6/78

EXPERIENCE:

Broad experience with vis/IR/submm optics: cameras, spectrometers, interferometers, adaptive optics, wavefront sensors, fiber optics, coronagraphy, holography, microscopy, fluorescence, light-field imaging.

Coronagraphy: Leading NASA APRA & TDEM projects to develop and test vortex phase masks for exoplanet coronagraphy. Led development of high-contrast vortex coronographs for the Palomar, Keck and Subaru telescopes.

JWST MIRI: Led the JPL design study and successful proposal for the JWST MIRI instrument; was initial JPL MIRI project scientist. Built the Infrared Coronagraphic Testbed to test the flight JWST-NIRCAM coronagraphic masks.

Nulling interferometry: Led the technical development of the Keck nuller, and a NASA APRA project to build the Palomar Fiber Nuller. Conceived the modified Mach-Zehnder nuller and the single-mode fiber nuller, as well as a highly accurate statistical null depth retrieval technique.

Observations: Very broad experience observing exoplanets, exozodiacal disks, the black hole at the Galactic Center, star formation regions, the planets in our solar system, the terrestrial atmosphere, and microbial life in terrestrial water samples. Was a Keck exozodi key project PI, and a NASA Origins program PI. Experience with spectroscopy from the optical to the radio.

PAST POSITIONS:

NASA ExoPAG: executive committee member, spring 2013 – spring 2016

JWST: (1998 - early 2000s): Mid-IR Steering Committee member; Ad Hoc SWG member; Mid-IR Program Planning Group member, MIRI Instrument Scientist (JWST now): member of MIRI coronagraph science team; member of NIRCAM coronagraph team

Keck Interferometer: Nuller Cognizant Engineer, Nulling Scientist, Keck key project PI (early 2000s)

TPF-Interferometer: SWG member, Interferometer Scientist, Nuller Cognizant Engineer (mid 2000s)
